Product Code	Product Name	
CA03-	Plastic Cleaner	

DNA® Plastic Cleaner surface preparation solution is specially designed to eliminate non-water soluble contaminants from plastics, remove surface grime and dirt as well remaining mould release agents and chemicals. Plastic Cleaner is a ready for use product suitable for most automotive plastics such as ABS, polycarbonate, SMC, RIM, RRIM, polypropylene and TPO and will not degrade the properties of the plastic.

Plastic Cleaner *Always check that you have the latest TDS*

MSDS

Observe all safety precautions in relation to this product's Material Safety Data Sheet

SAFETY

Always wear appropriate safety clothing, gloves, breathing & apparatus

STORAGE

Several years in cool, dry conditions

APPLICATION GUIDE:

1. Always test on a small inconspicuous area for compatibility.
2. Clean surface areas with suitable detergent and rinse thoroughly with clean water.
3. Wipe dry with clean cloth or blow dry with deionised air.
4. Soak a clean cloth with Plastic Cleaner.
5. Treat only one small area at a time using a 'two-rag wipe' technique, wet one rag with Plastic Cleaner and wipe the entire surface area with it and DO NOT allow to evaporate from the surface.
6. Use the second rag to immediately wipe the wet Plastic Cleaner from the surface BEFORE it evaporates! Allowing Plastic Cleaner to dry on the surface without wiping re-deposits the surface grime as the Plastic Cleaner dries.
7. Change cloths often, never use dirty cloths.
8. Do not spread contaminants being removed over other areas being cleaned. Any residue left may later discolour or cause stains.
9. Clean only as much area as can be sealed in one hour. If cleaned areas are again exposed to any contamination or weather, the surface must be cleaned again.
10. Change cloths often, never use dirty cloths. It is important to thoroughly clean the surface before any sanding operation. Sanding would grind contaminants into the surface.
11. Close container tightly after use. This prevents the cleaner from evaporating and losing its effectiveness.
