DNA® Aerosols are designed so anyone can create professional custom paint effects at home without needing professional spray painting equipment or needing to purchase commercial quantities of paints and other products.

DNA Aerosols are perfect for small projects such as sculptures, artworks, car parts, bikes, surfboards, skateboards, RC cars and planes, furniture and almost anything else that you care to paint!

These paints are designed to be easy to use, so in keeping it simple we have a few basic instructions below for each of our products to help you achieve the best results possible. When reading the instructions below, be sure to read the correct instructions for the specific product that you are using.

If you require any further information or instructions please do not hesitate to DNA with your questions via phone, email, Facebook or our website.

### Primary Instructions

- **Shake very well before and during use**
- **Always spray in warm and dry environment. Between 15 ~ 35°C with humidity below 70% is recommended.**
- **Do not spray in windy or dusty conditions.**
- **After use, if storing aerosol for re-use, fully invert can and spray until spray becomes clean. Remove the spray nozzle and clean if required before storing.**
- **Clean up with DNA reducer/thinner or gunwash.**

### Product Instructions

**Wax & Grease Remover / Anti Static Cleaner**

Working in small areas, spray item to be cleaned. Use liberally and as required. Dry item thoroughly, with a clean dry rag or cleaning wipe. For larger areas, several rags may be needed.

**Plastic Primer**

Ensure item is finely sanded with grey scotchbrite pad or similar. Clean item with DNA Anti Static Cleaner. Apply 2 light coats, allow 5 mins between coats. Apply DNA colour of choice.

**Basecoat - Black & Metallic Silver**

Clean item with DNA Wax and Grease Remover or Anti Static Cleaner. Plastic items should be primed with DNA Plastic Primer. Apply in light to medium coats. Allow 10-15 mins between coats, in a clean, warm, dry environment. Clearcoat with DNA High Gloss 1k Clear, or overcoat with DNA Candy, Metal Flake, or Colour Change colours.

**Colour Shift**

For use over DNA Black Basecoat as groundcoat, in a clean, warm, dry environment. Apply 3-4 medium wet coats, or until desired coverage is achieved. Allow 10-15 mins between coats. Clear coat with DNA High Gloss 1k Clear.

**Metal Flake**

For use over DNA Silver or Black aerosol as ground coat, in a clean, warm, dry environment. Apply in medium wet coats until desired coverage is achieved. Allow 10-15 mins between coats. Overcoat with DNA Candy aerosols or DNA High Gloss Clear.

**Candy**

For use over DNA Silver or Metal Flake aerosol as ground coats, in a clean, warm, dry environment. Apply in wet coats with a tight overlap pattern to achieve even coverage. Allow 10-15 minutes between coats. Apply 4-5 coats or until desired coverage is achieved. Use care not to overlap onto areas already coated, as candies will get darker with more coats. Once fully dry (normally 15-20 mins), clearcoat with DNA High Gloss 1k clear.

**High Gloss Clear**

For use as final Top-Coat on all DNA Aerosol products, in a clean, warm, dry environment. Apply in medium wet coats. Apply 2-3 coats, allowing 15 mins between coats. Allow to dry minimum 24 hours before handling. In colder environments, extended drying times will be required.

**Note:** High gloss clear has a poor chemical resistance. Not recommended for use where exposed to weather or sunlight for prolonged periods of time.
